The Inset Bracket Advantage

-  Self Locating for Easy Mounting
-  Works with Flush Bottom Cabinets (Universal Only)
-  Smooth Horizontal Adjustment
-  Anti-Slip Die Cast Insert
-  Made with Strong Glass Filled Polycarbonate
-  Attractive Wood Tone Coloring
-  Replaces Cumbersome Wood Blocks
-  Works with a Variety of Undermount Slides

Rear Brackets for Inset Undermount Applications

Tenn-Tex Plastics has designed specialty Undermount Rear Brackets for Inset Applications. When you install the Front Inset Brackets, the Undermount Drawer Slide must be mounted further back in the cabinet. The standard Overlay Rear Brackets will not allow the drawer slide to move further into the cabinet. The Inset Back Brackets from Tenn-Tex will allow you to mount your slide within 13 mm of the back panel. The Brackets have over 17 mm of side to side adjustment. Our Inset Rear Brackets will work with most undermount drawer slides. They are available with dowels for multiple drill patterns or in a screw on version. You can find our Inset Bracket Item Numbers in our Bracket Solutions Catalog at www.bracketsolutions.com.

Common Item Numbers for Rear Brackets for Inset Applications. For additional parts, contact Tenn-Tex Plastics.

Item #	Attachment	Back	Drill Pattern	QTY
C-280	Screw-On		X = 1.5 / Y = 6.5	400 qty
